PROBLEMS & SOLUTIONS

- Africans do not believe in themselves and they depend excessively on importation, resulting in low GDPs
- We realize a general struggle in African Economies despite its abundant natural resources.
- We notice that youths suffer unemployment and many of them are waiting for government to employ them instead of creating jobs and riches.
- There is inadequate knowledge, to bring about a creative and productive mindset to profitably make use of available resources.

Solutions

Introducing a new education system known as THE IDEA FORMATION SYSTEM, which enhances productivity through creative and innovative mindsets.

Change the paradigm of the archaic educational system of job seeking to a MODERN SYSTEM OF JOB AND RICHES CREATION, hence empowering the private sector instead of continuous dependence on government employment.

Creating the GEOMETRIC MULTIPLICATION GROWTH RATE SYSTEM FOR ENTREPRENEURS IN AFRICA, which will bring about the UNITY of the continent and then a booming economy.

Introducing THE DIVINE FACTOR in the business world (Deut.8:18), thereby cubing the canker worm of corruption, embezzlement and mismanagement.

VISION, MISSION & VALUES

“

Don't let others convince you that the idea is good when your gut tells you it's bad.

Trainings

We are already training in Cameroon more than 500 entrepreneurs with the innovative mindset geared at THINKING, CREATING AND PRODUCING. This will encourage the CONSUMMPTION and EXPORTATION OF HOME MADE GOODS AND SERVICE thus bringing a higher GDP.
